

BAVANI PERIASAMY

Associates Trainer

BAVANI comes from an IT background but her passion has always been in the area of learning and development. She has now been involved in the training industry for the past 12 years.

Bavani grew up in a family with many teachers and with a healthy curiosity of a person's cognitive abilities and behavioral characteristics. This passion led her to study and earn her certifications in psychometric assessment tools.

Today, much of her work revolves around student and youth programs as she is committed to developing future leaders of the country. She is very much involved in team building, psychometric assessment tools, game-based learning, motivation, self-awareness programs and career coaching for students and young adults as well as programs for corporate clients. She played various roles in the Skim Latihan 1Malaysia (now known as PROTÉGÉ). This was a training initiative by the Government in collaboration with GLCs to equip local fresh graduates with skills to increase employability. She has been invited to speak at career fairs and at the IIUM Career Fair 2019, she spoke on using LinkedIn as a branding tool for graduates. She also spends time coaching unemployed graduates to get a job.

She has been involved in working with 10-18 year-olds under DanaJamin's and TNB's CSR initiatives to build future leaders. Bavani was also involved in the INTENSE program, which involves coaching aspiring young social entrepreneurs in university to develop their SE ideas.

In 2020, after the first lockdown in Malaysia, she started holding virtual sessions for students on the topic of social media, cyber security and its impact on mental health.

Portfolio Highlights

- Advocating gratitude for a happier life
